Learn more about our Portfolio Startups

Acceleron Labs

Vertical: Enterprise
Technology: Hardware & Systems

Addverb Technologies

Vertical: Warehouses
Technology: Robotics

Astrome

Vertical: Telecom, Enterprise
Technology: 5G, Networking Infra

BosonQ Psi

Vertical: Enterprise
Technology: Quantum, Simulations

BrainsightAI

Vertical: Healthcare
Technology: AI

Calligo Tech

Vertical: High Performance Systems,
Silicon & Systems
Technology: Hardware accelerators

Camcom

Vertical: Manufacturing, Automotive, BFSI
Technology: AI, Computer vision

Constems AI Systems

Vertical: Industrial, Manufacturing
Technology: AI, Computer vision

Cron Systems

Vertical: 3D data perception platform
Technology: AI, Computer vision

Cyclops MedTech

Vertical: Healthcare
Technology: AI, Computer vision

CynLr

Vertical: Industrial, Manufacturing
Technology: Robotics, AI, Computer vision

Dave.AI

Vertical: Retail, Banking
Technology: AI, Computer vision

DeepSight AI Labs

Vertical: BFSI
Technology: AI, Computer vision

DragonFruit

Vertical: Horizontal
Technology: AI, Computer vision

Eder labs

Vertical: Horizontal
Technology: Machine Learning

Entropik Tech

Vertical: Retail, Consumer
Technology: AI, Computer vision

HaystackAnalytics

Vertical: Healthcare
Technology: Genomics

Infilect Technologies

Vertical: Retail
Technology: AI, Computer vision

Intangles

Vertical: Automotive OEM
Technology: IOT, ML

J I D O K A

Jidoka

Vertical: Industrial, Manufacturing
Technology: AI, Computer vision

Letsving

Vertical: Enterprise
Technology: Platform

LightSpeed Photonics

Vertical: Semiconductors, Data Centres
Technology: Optoelectronics

LivNSense

Vertical: Industrial, Manufacturing
Technology: IoT, AI, Computer vision

N5 Technologies

Vertical: FinTech, BFSI
Technology: High Performance Computing

NeuroPixel.AI
AMPLIFYING DIGITAL STOREFRONTS

Neuropixel.AI

Vertical: E-commerce, RetailTech
Technology: AI, Deep Neural Net Framework

Computer vision & AI powered imaging

ORBO.AI

Vertical: Horizontal
Technology: AI, Computer vision

PitchVision

Vertical: Sports Technology, Media
Technology: Computer Vision, AI

QNu Labs

Vertical: Cyber security
Technology: Cryptography

Qualitas Technologies

Vertical: Industrial, Manufacturing
Technology: AI, Computer vision

Qure.AI

Vertical: Healthcare
Technology: AI, Computer vision

Senseforth

Vertical: BFSI, E-Commerce, Telecom
Technology: AI, NLP

Sensovision

Vertical: Industrial, Manufacturing
Technology: AI, Computer vision

Simyog

Vertical: Automotive, EV Manufacturers
Technology: Simulation, Physics Model

Smart Ship Hub

Vertical: Logistics, Supply Chain
Technology: IoT

Staqu

Vertical: Enterprise, BFSI, Government
Technology: AI, Computer vision

Statwig

Vertical: Supply chain
Technology: IoT, Blockchain

SwitchOn

Vertical: Industrial, Manufacturing
Technology: IoT, AI, Computer vision

TenXer Technologies

Vertical: ESDM
Technology: IoT, Virtual lab

ToneTag

Vertical: Retail
Technology: IOT, ML

Tranzmeo IT Solutions

Vertical: Industrial (Oil & Gas)
Technology: IoT

Unbox Robotics

Vertical: Retail Warehouses
Technology: Robotics

Vacus Tech

Vertical: Industrial
Technology: IoT

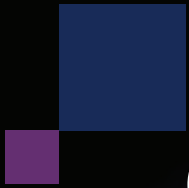

Voxelgrids

Vertical: Healthcare, Medical Devices
Technology: MRI, Health Diagnostics

Wobot Intelligence

Vertical: Food Services, Retail, and Industrial
Technology: AI, Computer vision

Glossary Terms

Sl.No.	Startup Name	Product Name	Product Brief	Website
1.	Accelaron Labs	MDC	Accelaron Labs' MDC with software defined mini data center features enables true HCI (Hyper Converged Infrastructure) solutions for enterprise customers. MDC with its low latency network, high bandwidth backbone enables virtualized and distributed acceleration. MDC system accelerates storage, server and network performance rack-wise or box-wise.	http://www.accelaronlabs.com/
2.	Addverb Technologies	Zippy Dynamo Quadron Co-bots	Industrial Automation provider focusing on Robotics applications for Industrial usage, Warehouse Automation Technologies & Industrial Internet of things (IIOT).	https://addverb.com/
3.	Astrome	GigaMesh	Astrome is helping telecom providers extend 5G services into low-density rural areas through fast, cost-effective, and easy-to-implement wireless broadband technology.	https://astrome.co/
4.	BosonQ Psi	BQPhy™	Developer of quantum simulation software for applications in chemicals and materials	https://www.bosonqpsi.com/
5.	BrainsightAI	VoxelBox Explore	VoxelBox Explore automates rs-fMRI, dMRI & sMRI processing, enables advanced AI and computational analysis, etc	https://www.brainsightai.com/
6.	Calligo Tech	CRISP Core	POSIT Based Co-Processor with RISC V – ASIC and Accelerator Card	https://calligotech.com/
7.	Camcom	Camcom	Enterprise defect and damage assessment platform built on a computer vision stack already in production with market leaders in the automotive, supply chain and bottling industries in India. Deployed using mobile phone cameras and industrial rigs (where required) and hence immensely scalable, the platform is vertical agnostic and takes subjectivity out of the QC process.	www.camcom.ai

Sl.No.	Startup Name	Product Name	Product Brief	Website
8.	Constems AI Systems	BoVi-AI & IRA	AI based Vision Inspection Platform; AI with infinite Vision	www.constems-ai.com
9.	Cron Systems	SenseEdge	CRON Systems is a leading provider of high-performance, sensing products and perception software that brings vision to the UAVs, automobiles, mapping, security and general surveillance and other industries to enhance situational awareness.	www.cronai.ai
10.	Cyclops MedTech	BalanceEye and BrainEye	Eye tracking and deep learning based diagnostic and screening solutions for Neurological diseases with both clinical and telemedicine use cases	www.cyclopsmedtech.com
11.	CynLr	CynLr	CynLr is a visual object intelligence platform that enables industrial robotic arms to see, understand and manipulate any object in random unstructured environments.	www.cynlr.com
12.	Dave.Ai	Dave Ai	Dave.ai is an AI platform that helps bring the power of online to offline brands. Dave helps these brands create Virtual/Pop Up stores with a sales avatar for remote/online product discovery and In-Store Personalisation using kiosks or VR. Thus converting every marketing interaction into a sales opportunity. The patent pending platform combines four layers of technology to build a virtual avatar - Speech & NLP, Facial Detection, Real time 3D Rendering and a recommender system.	www.iamdave.ai
13.	DeepSight AI Labs	Super Secure	A Smart Video Surveillance based on advanced Artificial Intelligence and Deep Learning technologies. SuperSecure+ adds intelligence to existing or new CCTV cameras for the physical banking based threats namely human intrusion, people with helmets, masks, weapons, face recognition.	https://deepsightlabs.com/

Sl.No.	Startup Name	Product Name	Product Brief	Website
14.	DragonFruit	Dragonfruit Client, Cloud, Split AI	Dragonfruit is the industry's first petabyte-scale hybrid video analytics solution, powered by cutting-edge AI infrastructure and models. Our mission is to democratise AI by lowering the barrier of entry and providing innovative, flexible solutions to solve pressing needs. One of Dragonfruit's major focus areas is Law Enforcement and Physical Security.	https://dragonfruit.ai/
15.	Eder labs	Fluid	We make AI deployments lighter and effective while ensuring data / IP privacy, without requiring data to move from source. Our product, Fluid, combines 'federated learning' and 'confidential computing' to protect both, data and model IPs.	www.eder.io
16.	Entropik Tech	AffectLab	Entropik Tech's proprietary multi-modal emotion recognition technologies combined with AI helps brands measure the cognitive and emotional responses of consumers to their content and product experiences. Turning emotions into actionable insights, Entropik helps them optimize brand experience journeys and solve real business problems across industries	https://www.entropiktech.com/
17.	HaystackAnalytics	OmegaTB	Combating drug resistance has no Plan B. It must be done, today. The most critical step towards that is to stop using antibiotics where not required, as evinced by complete and comprehensive drug susceptibility profiling. Genomics based DST is the only technology, which is complete, and scalable for performing DST on Day Zero.	www.haystackanalytics.in
18.	Infilect Technologies	Infviz	Infilect digitizes every shelf in every store every day, answers why and how of out of stock and over stock problems. The solution specifically measures the degree of on shelf availability of every SKU and share of shelf of every product-brand. This helps retails brands get real-time data on out of stock and over stock on the retail shelves in order to take appropriate merchandising actions.	www.infilect.com

Sl.No.	Startup Name	Product Name	Product Brief	Website
19.	Intangles	Intangles	Data-driven digital twin and IoT-enabled solutions for vehicle monitoring and fleet management	https://www.intangles.ai
20.	Jidoka	TIGRIS HURON MIYAKE	Jidoka, a principle which advocates “intelligent automation”, is at the heart of our products where we combine Artificial Intelligence with Industry Automation & Machine Vision to deliver cutting edge solutions. We specialize in automating detection of visual defects – a process that is highly subjective by nature across industries. Experience the most comprehensive solution – on your road to achieving Jidoka.	https://jidoka-tech.com/
21.	Letsving	Letsving	Unified Video Conference Platform For Hybrid Work that works with Any OEM Camera. Any Meeting Platform	https://www.letsving.com
22.	LightSpeed Photonics	LightKonnnect	LightSpeed Photonics creates compact, field-programmable and modular computing modules for real-time processing of data-intensive applications like video streaming, AI, and cybersecurity.	https://lightspeedphotonics.com/
23.	LivNSense	iSense4i™ CCR4.0 WELDSENSE® ViCAS™ WiSH	LivNSense is a pioneering Industrial IoT & AI Platform led venture that serves the manufacturing and production industries, with a primary focus on continuous manufacturing and discrete manufacturing Industry.	https://livnsense.com/
24.	N5 Technologies	RUMI™	N5 offers an edge-cloud platform hardware component for ultra-low latency applications that process large amounts of data in real-time.	https://n5corp.com/
25.	Neuropixel.AI	Neuropixel	NeuroPixel helps retailers create fashion product catalogues without human models and expensive photoshoots, leveraging customizable, virtual, human-like models.	http://neuropixel.ai/
26.	ORBO.AI	ORBO AI	A deep learning and computer vision-based platform that is enhancing low-resolution videos to 1080p or 4K video formats in real-time.	www.orbo.ai

Sl.No.	Startup Name	Product Name	Product Brief	Website
27.	PitchVision	Pitch Vision TV	PitchVision's platform helps athletes capture and utilise personal sports performance data simply, by efficiently recording and analysing their performance on the field.	http://pitchvision.com/
28.	QNu Labs	QKD, QRNG, PQC	QuNu Labs primary product range deals with Quantum Key Distribution (QKD). QKD solves the problem of secure key distribution by allowing the exchange of a cryptographic key between two remote parties through an exchange of encoded quantum bits (qubits), which are unhackable, by virtue of the laws of quantum physics	www.qnulabs.com
29.	Qualitas Technologies	EagleEye® Camera EagleEye® Cloud EagleEye® Egde	Qualitas EagleEye inspection system can be used in any type of industry where quality control is necessary. Data collected by this system helps to improve the efficiency in the production line. This inspection system provides manufacturing companies to conduct 100 % inspection of parts or components for quality control purposes. If you want to improve the quality and efficiency of your industry then this inspection system is a better solution.	https://qualitastech.com/
30.	Qure.AI	Qxr, QER	Qure.ai is an AI-based clinical decision support tool for analyzing diagnostic images and giving insight to the doctor. Its radiology solution can diagnose disease from CT Scans, MRIs and X-rays as well as outline and quantify regions of interest such as tumors or lung disease patterns to make healthcare more accessible and affordable.	https://www.qure.ai/
31.	Senseforth	A.Ware	Conversational AI and chatbot solutions built by Senseforth address queries, resolve issues, perform tasks, make product recommendations, and also provide meaningful insights.	https://www.senseforth.ai

Sl.No.	Startup Name	Product Name	Product Brief	Website
32.	Sensovision	QualViz, VizSort	SensoVision is an AI Tech company working in the field of Quality Inspection for Manufacturing Units. SensoVision uses AI and Computer Vision with custom Mechanical and Optical Engineering to make end to end solutions. These solutions are capable of inspecting parts ranging from screws to big automobiles in an automated manner. By staying true to its vision of Taking research into Product, SensoVision is transforming the product quality Inspection in various industries to take it a notch above. While currently focused on Machine vision, the roadmap includes collecting large amount of data points to evolve a deep learning model	www.sensoviz.com
33.	Simyog	Compliance-Scope	System-level simulations for automobile designers to catch EMI and EMC issues early on in the design cycle, thereby reducing the need to build and test several prototypes to check the components' resistance to EMI	www.simyog.com
34.	Smart Ship Hub	Smart Ship© Hub Digital Platform Smart Ship© IOT Services	Smart Ship Hub digital platform provides specific on-demand cloud services for end to end maritime ecosystem. supports Commercial vessels, Specialized vessels, Naval vessels, Offshore & Fishing vessels in ensuring optimum vessel performance, lesser downtime, emissions & operational compliance while making vessels safer & reliable. Provides the status of the fleet, business dashboard which captures visibility on the utilization, maritime personnel, inspection, checklist, etc. Enabling ship owners and managers to bring in substantial operational as well as cost benefits in the business. Smart Ship© IoT helps through setting up continuous tracking, easy port operations, material handling, preventive maintenance of ships, smart sensors and gateways.	https://smartshiphub.com

Sl.No.	Startup Name	Product Name	Product Brief	Website
35.	Staqu	JARVIS™ PAIS SIAN	AI startup in the security and enterprise big data analytics domain, with facial recognition technology and intelligent monitoring of objects, crowd and perimeter monitoring with real-time alerts to significantly reduce the time for relevant actions.	http://www.staqu.com
36.	Statwig	Statwig	Statwig leverages blockchain and connected sensors to provide real-time, tamper-proof and end-to-end tracking of the complete life cycle of the product as it moves along the cold chain, especially vaccine delivery.	www.statwig.com
37.	SwitchOn	SwitchOn	SwitchOn leverage technologies such as Industrial IoT and Machine learning to digitize critical equipment for industries by creating Digital Twins of equipment to help customers reduce unplanned downtime, improve operational efficiency and maximize asset utilization.	http://switchon.io/
38.	TenXer Technologies		Semiconductor Companies engage with their customers the way they did decades ago - with physical Evaluation Modules. TenXer's Virtual Lab enables them to move their ICs on the cloud. Users can access the IC set up using a browser and evaluate virtually, increasing the effectiveness.	www.tenxertech.com
39.	ToneTag	Tonetag	ToneTag solution enables data communication and engagement services over sound waves. This is transforming retail ecosystem with features like real-time payment acknowledgement, proximity-based services & loyalty solutions	https://www.tonetag.com
40.	Tranzmeo IT Solutions	T-Connect	Tranzmeo's T-Connect is an intelligent High-performance System, which is designed to redefine the anomaly & Intrusion detection in Oil & Gas pipelines with the help of optical sensing technology and deep learning	www.tranzmeo.com

Sl.No.	Startup Name	Product Name	Product Brief	Website
41.	Unbox Robotics	UnboxRobotics	Unbox Robotics is building software-defined robotics platforms to enable logistics players to automate and radically improve their operations on-demand in a limited footprint and capital. We apply proprietary Swarm Intelligence and ML algorithms inspired by nature to re-define the way companies' sort and ship orders	www.unboxrobotics.com
42.	Vacus Tech		Vacus Tech is a Wireless Indoor Positioning Company with patented technology for automated configurable fencing, precise positioning and accounting of assets and people with an accuracy of 30 cm.	www.vacustech.com
43.	Voxelgrids	Magnetic Resonance Imaging Scanners	Voxelgrids has developed the world's first liquid helium-free MRI scanner, reducing cost and size to make MRI screening affordable and accessible for all.	https://www.voxelgrids.com/
44.	Wobot Intelligence	Wobot.ai	Wobot Intelligence enables vision-based process compliance. Wobot's deep learning computer vision tool plugs into existing cameras and helps in monitoring industry specific SOPs. The AI identifies people, their activities, and objects. Wobot has helped organizations in Food, Retail, and Manufacturing to reduce the cost of monitoring employees, risk of Non-compliance, pilferage, and improve productivity.	www.wobot.ai

intel®
